

Jasmina Kunwar

416-931-5585 | jasmina.kunwar@gmail.com | Calgary, AB

PROFESSIONAL SUMMARY

Motivated and technically proficient IT professional with hands-on experience in cloud services, software development, and system support. Skilled in Microsoft 365, Azure, Power Platform fundamentals, and web development using React, JavaScript, and Firebase. Strong background in data management, technical troubleshooting, and project collaboration. Eager to apply a growth mindset and agile approach in a real-world digital solutions environment.

SKILLS

- **Microsoft Technologies:** Power Platform (Power Apps, Power Automate—beginner), Azure, Microsoft 365, SharePoint, Teams, Dynamics 365
- **Development:** React, Redux, Next.js, JavaScript, TypeScript, Angular, HTML, CSS, Firebase
- **Cloud & Server:** Azure, Google Cloud, O365, Windows Server, Active Directory, VMware
- **Data Tools:** SQL, Power BI (basic), data modeling, reporting, dashboard creation
- **Support & Collaboration:** Technical documentation, end-user training, cross-functional team collaboration
- **Soft Skills:** Analytical thinking, communication, time management, quick learner, adaptable

PROFESSIONAL EXPERIENCE

Data Management Specialist

08/2024 to Present

Pro-Cert Organic Ltd, Saskatoon, Canada

- Manage and maintain client and certification data in an enterprise database, ensuring accuracy and up-to-date records.
- Collaborate with IT, analytics, and business teams to support data-driven projects aligned with organizational goals.
- Coordinate audit schedules for clients, ensuring timely inspections and compliance with certification standards.
- Generate detailed reports on certification status, audit results, and compliance trends to assist in decision-making.
- Monitor certification expiration dates and send automatic renewal reminders to keep clients compliant.
- Troubleshoot software and system issues, escalating technical concerns to IT teams when necessary.

Associate Developer

08/2021 to 04/2022

Dogma Group, London, United Kingdom

- Designed and implemented Microsoft Dynamics 365 CRM solutions, tailoring them to business requirements for improved customer relationship management.

- Developed responsive web applications using JavaScript, React, Redux, and Angular, ensuring a smooth and interactive user experience.
- Assisted in designing, implementing, and managing cloud-based infrastructures on Azure, Google Cloud, and O365 to enhance application scalability and reliability.
- Participated in troubleshooting complex IT issues, ensuring system performance, and reducing downtime.
- Configured and optimized cloud-hosted solutions to enhance performance and cost efficiency.
- Provided technical support and training to overseas customers, helping them resolve software and server-related issues.

System Support

08/2019 to 08/2021

Inspiring Lab, Kathmandu, Nepal

- Assisted in managing and maintaining Unix/Linux server environments, ensuring security, stability, and efficient operations.
- Provided technical support via phone and email, troubleshooting hardware, software, and network issues for corporate clients.
- Maintained file systems and data storage, organizing both physical and digital records for seamless data retrieval.
- Supported cloud infrastructure setup and management, integrating Azure, O365, and Google Cloud services into business operations.
- Assisted in the implementation of security policies to protect network and system resources.
- Identified and resolved technical problems quickly, minimizing disruptions to business operations.

EDUCATION

Computer Software and Database Development

05/2022 to 12/2023

Lambton College, Toronto, Ontario

- Focused on database management, software development, cloud computing, and IT security.
- Developed hands-on experience with SQL databases, web APIs, and cloud services.

BE in Computer Engineering

08/2014 to 08/2018

Nepal Engineering College, Kathmandu, Nepal

- Specialized in software engineering, network security, and system architecture.
- Gained practical experience with coding, database management, and IT infrastructure.

CERTIFICATION

- Microsoft 365: Administration
- Microsoft Azure Developer Associate (AZAZ-204)
- Design Thinking: Customer Experience
